

The background is a collage of various household items and icons, all in shades of blue and teal. On the left, there's a person's hand holding a bag of coffee. In the center, a person is shown from behind, holding a bag. To the right, there's a grid of icons representing different objects like a soccer ball, a cup, a chair, a game controller, a trash can, a TV, a comb, and a cup. Below the icons, there are several circular numbers in different colors (blue, green, purple) arranged in a pattern. The overall theme is domestic and cognitive stimulation.

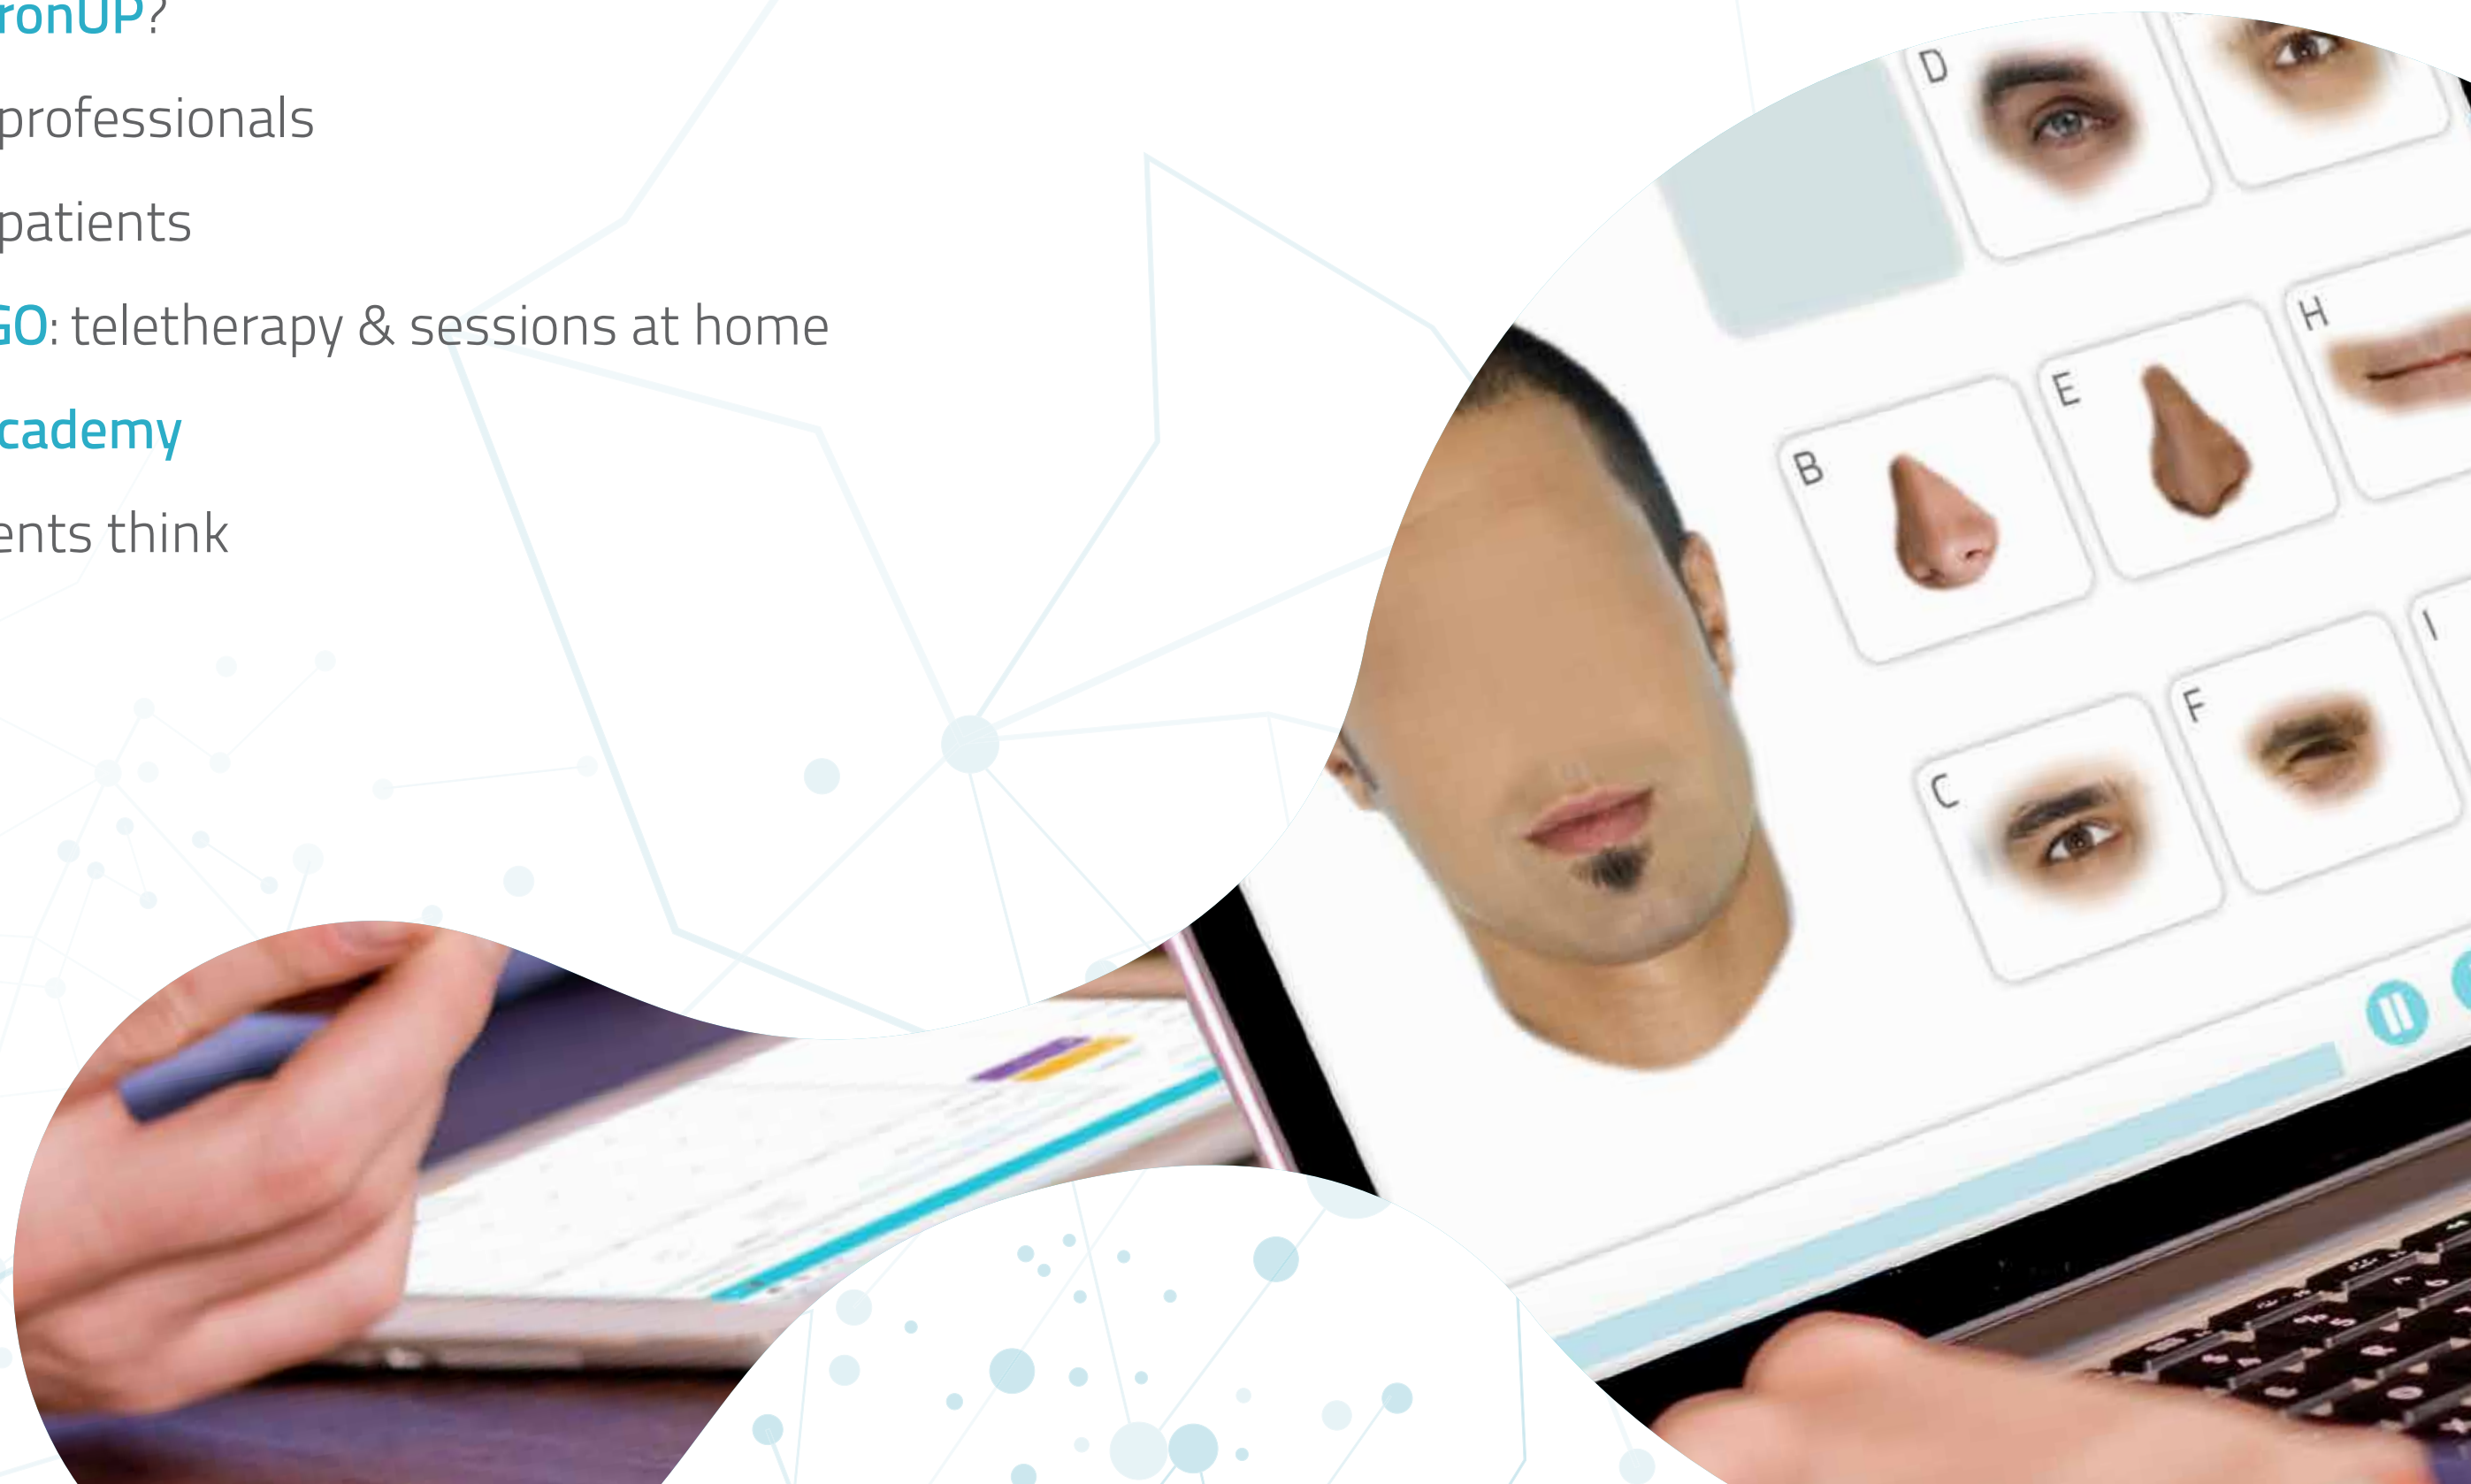

neuronUP

Neurorehabilitation tool for professionals
with over 10,000 cognitive stimulation activities

What is NeuronUP?

NeuronUP is a web platform that offers professionals **activities of daily living** for the rehabilitation and cognitive stimulation of people with brain damage, neurodegenerative diseases (Alzheimer's, MS, Parkinson's), neurodevelopmental disorders (ADHD, ASD), mental and intellectual disabilities, deficits from normal aging, etc.

In addition, the platform features tools to help the professional design, in mere minutes, a **personalized intervention** with hundreds of activities that fit the cognitive needs of each user.

Professionals also have **access to all results instantly** allowing them to **analyze quickly and redefine the therapy** according to the progress and needs of each patient.

Scientifically validated
platform by research
outside of NeuronUP

More than 10,000 cognitive rehabilitation activities in digital and paper formats

Professional support in research and development

Online patient management

Free and online training with NeuronUP Academy

Teletherapy; Patient access from home with

Thousands of activities

- More than 10,000 exercises with **customizable content** generators that allow the creation of unlimited and ecological materials.
- The activities are classified into more than **40 cognitive processes** as well as being divided by age and difficulty.
- Online library of activities in constant growth.

Programming of sessions

- Plan your sessions in advance to **make the most out of your time** in the clinic with your patients.
- **Teletherapy:** Reinforce the intervention by having your patients work remotely.

Online platform. **No installation or updates required.**

Results analyzer

- Archive and **track information** on your patients: analyze your patients' results and check their evolution.
- NeuronUP records a multitude of metrics: correct answers, errors, omissions, attempts, execution time...

Access from any device:

desktop, laptop, tablet, interactive whiteboard...

Use with unlimited patients.

Personalized and **on-demand technical support** and **customer service.**

- 🦋 **Intervention adapted and personalized** to the needs of each patient.
- 🦋 Activities developed by neuropsychologists and occupational therapists based on **activities of daily living**.
- 🦋 Motivational material with **age-appropriate design** for each patient.
- 🦋 Activities in **digital** and **paper format**.
- 🦋 Possibility of **reinforcing the intervention with activities done at home** (always guided by the professional).

Did you know that with NeuronUP, besides working at your clinic or hospital you can also **create sessions for your patients to work from the comfort of their home?**

Your patients' vacations, their long working days, the distance between them and your workplace or their mobility problems will no longer be a limitation to doing your job.

Advantages for professionals

- **Expanding the capacity of the business** by managing the rehabilitation of patients located in different parts of the world.
- Performing a **controlled and personalized remote intervention** with all the results being stored on the platform.
- **Redefining the intervention** according to the progress of each patient promoting a continuous and guided improvement.

Advantages for patients

- **Continuing rehabilitation from the comfort of their own home** at any time of day.
- **Reinforcing** of the activities worked on in the clinic.
- **Strengthening the adherence of the treatment.**

Free online training academy for professionals of rehabilitation and cognitive stimulation.

Who better than our clients to explain from their experience
working with NeuronUP?

Variety of activities and personalization

▪ **University of Navarra Clinic** ▪

"NeuronUP offers us a great variety of activities developed and classified based on clinical evidence and neuroscience allowing us to offer a more complete neurorehabilitation intervention with the possibility of personalizing the tasks adapted to the needs of each patient".

Saving time

▪ **Menteágil** ▪

"NeuronUP saves time in planning of customized sessions and the possibility of redefining the therapy according to the progress of the patient".

Working from home

▪ **Alzheimer's Family Association of Bajo Aragón** ▪

'NeuronUP2GO allows the possibility for the patient to receive cognitive stimulation without having to travel to your facility, it allows greater accessibility to non pharmacological treatment in rural settings".

Monitoring of results

▪ **VITHAS Hospital Virgen del Mar** ▪

'NeuronUP allows for a structured and controlled intervention, which shows the continuous progress of our patients in the different activities".

Attractive for patients

▪ **Centro Psico-logos** ▪

'With NeuronUP, patients improve without realizing they're working".

Customer Service

▪ **CITPA** ▪

'The support service responds quickly and clearly to questions and there is a real commitment to continually update the platform and provide a quality product".
